To Prevent and Cure Skin Cancer

2021 Skin Cancer Research Seed Grants Request for Applications

The Skin Cancer Institute (SCI) announces the availability of research funds to serve as seed money for skin cancer researchers to test novel strategies for prevention, detection, or treatment of skin cancer.

SCI unifies the University of Arizona Cancer Center’s many skin cancer-related activities into one coordinated entity. We seek to bring together innovative research, visionary clinical care, and life-changing education and community outreach under one virtual roof. The SCI is committed to understanding skin cancer etiology, prevention, and treatment. Translation of these discoveries from the laboratory to the clinic to the community will improve health and reduce the skin cancer burden. Visit the SCI website for more information on the Institute.

Funding Mechanisms

- **Eligibility:** These funds are to serve as seed money to support faculty and research fellows from any department at the University of Arizona who have a specific research focus in skin cancer prevention, detection, or treatment. Total Pilot Grant budget for a maximum of one (1) year cannot exceed $10,000.
- **Award guidelines:** The research should be completed within one year. It is anticipated that 2 to 3 awards of approximately $5,000 to $10,000 will be funded.

Submission Guidelines

- Applications must address important issues concerning the etiology, prevention, diagnosis, or treatment of skin cancers
- Research proposals must be of a translational nature, either laboratory-based or behavioral.
- General Instructions for Proposal Submission: Complete the cover sheet and proposal, following the proposal format and page limits described below.
  1) Cover Page/Lay Summary
  2) Research Plan – 3 pages maximum organized as Specific Aims, Rationale and Significance, and Experimental Approach/Methods
  3) References – 2 pages maximum
  4) Budget, budget justification, and a list of all current research support –2 pages max
  5) Biographical Sketch in the new NIH format – 5 pages max
- Email the completed application to Dr. Robin Harris rbharris@email.arizona.edu

Review Criteria

- Does the application address important issues concerning the etiology, prevention, diagnosis, or treatment of skin cancers?
- Likelihood of the project being completed in 1 year
- Likelihood of the project resulting in a manuscript and/or future grant
- Is the research proposal of a translational nature, either laboratory-based or behavioral?

Timeline

Deadline for receipt of applications: **Friday, April 2nd, 2021**
Notice of grant award: Around **May 3rd, 2021**
