

## Improving Access to Quality Medical Care

The practice and delivery of healthcare is changing with an emphasis on improving quality, safety, efficiency, & access to care. Telemedicine can help you achieve these goals! The Arizona Telemedicine Program and Southwest Telehealth Resource Center invite you to a **free one-hour** webinar on the implementation and practice of telemedicine.

# *DIY TelePharmacy: How Actually to Do It*

Wednesday, May 18, 2022 ~ 12:00 pm Arizona

12:00 pm MST (PDT)

TelePharmacy allows us to efficiently address patients' needs and can integrate pharmacists into direct medical care. Learn from one such pharmacist that staffs the HIV clinics that includes the HIV community at large, and the Department of Corrections. These pharmacists address and order medications, vaccines and needed clinic visits, along with renewing HIV medications for the next year and independently operating the TelePrEP program.

### The topics for this webinar are:

1. Explaining the components needed to do telepharmacy.
2. How Dr. York actually conducts his outpatient clinics for the Department of Corrections, TelePrEP.
3. Explaining plan for in-patient telepharmacy.
4. Krystal Fimbres explains how to interact with the difference EMRs to provide seamless linkup with patients.

### Facilitator:

**Stephen Klotz, MD**  
Professor, UArizona,  
College of Medicine  
Medical Director, Arizona  
Telemedicine Program

### Presenters:

**Larry York, PharmD,**  
**BCIDP, BCPS, AAHIVP**  
Clinical Pharmacist, Infectious  
Diseases and HIV/AIDS  
College of Medicine
