“Cancer Control & Implementation Science: Challenges & Opportunities”

María E. Fernández, PhD
Lorne Bain Distinguished Professor in Public Health and Medicine
Professor, Health Promotion and Behavioral Sciences
Director, Center for Health Promotion and Prevention Research
Co-Director, Texas Institute for Implementation Science, School of Public Health
University of Texas Health Science Center at Houston

Summary: This presentation will provide background on key principles of implementation science and its importance in cancer prevention and control. It will provide examples from studies that have focused on decreasing cancer-related health disparities.
