Integration of a Genetic Counselor into a specialty clinic

Holli Horak, MD

Professor of Neurology (non-tenure), Educator Scholar Track
Neurology Clerkship Director
Clinical Neurophysiology Fellowship Director

Dr. Horak has extensive training and experience in the treatment of neuromuscular diseases, including muscular dystrophy and ALS. Her clinical interests include caring for patients with ALS, muscular dystrophy.

In addition to her clinical practice, Dr. Horak is involved in medical education. She teaches medical students, residents, and fellows and Genetic Counseling students at the University of Arizona College of Medicine.

Bridget Maloney, MS, CGC

Clinical Instructor, Pharmacy Practice-Science

Bridget Maloney is a board-certified genetic counselor specializing in clinical neurogenetics. She provides genetic counseling services for various neurology subspecialties, including epilepsy, movement disorders, and neuromuscular diseases.

In addition, Bridget works as a Teratology Information Specialist for MotherToBaby Arizona, and as a clinical instructor and clinical supervisor for the University of Arizona Genetic Counseling Graduate Program
