

## Visiting Scholar

Tuesday November 14, 10AM

### Innovative Approaches to Trauma and Mental Health Research

**CON 470 or by Zoom**

*Contact Office of Research & Scholarship for meeting link*

**Chiyong Lee, PhD, RN**

**Assistant Professor**

**University of Washington Bothell**

Dr. Chiyong Lee (she/her/hers) earned her BSN (2013) and MSN (2017) degrees from Seoul National University College of Nursing and completed her PhD in nursing (2020) at Duke University School of Nursing. Dr. Lee has a strong background in clinical nursing, having worked as a professional nurse in the Emergency Department/Severe Trauma Center (2013-2014) and the Cardiac Intensive Care Unit (2014-2017) at Samsung Medical Center in South Korea. Additionally, she served as a clinical instructor at Seoul National University Hospital in 2017. Dr. Lee's research in mental health encompasses three interconnected areas: 1) exploring the biological foundations of mental disorders; 2) investigating the dynamics of symptoms within and across mental disorders; and 3) developing predictive models for mental disorders. As a methodologist with a strong statistical background, she employs advanced theoretical and data-driven analytical techniques in her research. Currently, she is actively collaborating with the AURORA team at the University of North Carolina, Chapel Hill, conducting research on the heterogeneous trajectories of adverse post-traumatic neuropsychiatric sequelae (APNS) among recent trauma survivors. Her work also involves identifying critical genetic, epigenetic, neuropsychiatric, and biological factors associated with these trajectories.
