

THE UNIVERSITY OF ARIZONA  
COLLEGE OF MEDICINE TUCSON  
**Pharmacology**

## Presents

### **“Repurposing Peroxisome Proliferator-Activated Receptor- $\alpha$ (PPAR $\alpha$ ) Agonists For the Treatment of Chemotherapy-Induced Peripheral Neuropathy (CIPN)”**

By

**M. Imad Damaj, Ph.D.**  
**Professor of Pharmacology & Toxicology**  
**Co-Director - Translational Research Initiative for Pain and**  
**Neuropathy**  
**Virginia Commonwealth University**

Host: Dr. Rajesh Khanna

**Abstract:** Dr. Damaj will discuss the role of Proliferator-Activated Receptor- $\alpha$  in Chemotherapy-Induced Peripheral Neuropathy in animal models. In addition, he will present new data that suggest that the PPAR $\alpha$  agonists Fibrates can be repurposed for the treatment of CIPN using multiple approaches

**Wednesday, November 10, 2021**

**11:00 am – Noon - AHSC 8403**

**Or by Zoom: <https://arizona.zoom.us/j/84524481802>**

**Meeting ID 845 2448 1802**
