Presents

“Repurposing Peroxisome Proliferator-Activated Receptor-α (PPARα) Agonists For the Treatment of Chemotherapy-Induced Peripheral Neuropathy (CIPN)”

By

M. Imad Damaj, Ph.D.
Professor of Pharmacology & Toxicology
Co-Director - Translational Research Initiative for Pain and Neuropathy
Virginia Commonwealth University

Host: Dr. Rajesh Khanna

Abstract: Dr. Damaj will discuss the role of Proliferator-Activated Receptor-α in Chemotherapy-Induced Peripheral Neuropathy in animal models. In addition, he will present new data that suggest that the PPARα agonists Fibrates can be repurposed for the treatment of CIPN using multiple approaches

Wednesday, November 10, 2021
11:00 am – Noon - AHSC 8403
