DEPARTMENT OF SURGERY WELCOMES COLORECTAL SURGEON DR. PHILIP ROSEN

Philip Rosen, MD, joins the Department of Surgery as a clinical assistant professor of colon and rectal surgery in the Division of Surgical Oncology.

The University of Arizona College of Medicine - Tucson is pleased to welcome Philip L. Rosen, MD, to the Department of Surgery as a clinical assistant professor of colon and rectal surgery in the Division of Surgical Oncology.

Dr. Rosen specializes in minimally invasive colon and rectal surgery including robotic and laparoscopic surgery as well as screening colonoscopies and office-based procedures.

“I believe in treating colon, rectal and anal issues nonoperatively whenever possible,” he said. “When surgery is required, I use the latest technology and minimally invasive techniques including robotic and laparoscopic surgery to maximize safety, minimize scarring, and return patients to their healthy lives as quickly as possible.”

Dr. Rosen received his medical degree from the University of Pennsylvania Perelman School of Medicine. He completed his training in general surgery at SUNY Downstate/Kings County Medical Center in Brooklyn, NY, and he completed his colon and rectal surgery fellowship with a focus on robotic and minimally invasive surgery at the Colon and Rectal Clinic of Orlando. Prior to joining the University of Arizona, he practiced at the Optum Multispecialty Group in Long Island, NY.

Dr. Rosen is dual board certified in both general surgery and colorectal surgery. His research interests include minimally invasive surgery and cancer outcomes.

“Dr. Rosen is a great addition to our team of colorectal surgeons and brings the latest technology and treatments to the program,” James Warneke, MD, interim division chief of surgical oncology, said.

Outside of medicine and surgery, Dr. Rosen enjoys tennis, cooking, and exploring Arizona with family and friends.
